Forecast for Monday 14 Feb 2022

Weather: Rather cloudy with rain or sleet showers, mostly dying out with sunny spells developing. Mostly dry by mid morning and there will be some bright or sunny spells through the afternoon. Remaining dry in the evening with long clear periods.

Chance of cloud-free hill tops above 700m: 40% rising to 80% by afternoon, cloud will lift and clear slowly during the morning.

Low cloud and visibility: Broken low cloud layers are likely in the morning from 500m and above. Cloud bases will become more scattered and lift to 700m by late morning with a few clear summits expected by later afternoon. Visibility will be moderate or poor at first and in sleet or summit snow visibility may be very poor at times with good navigation skills required. General visibility will be good or very good by afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Cold northwesterly winds will strengthen with gales on summits, freezing level will also lower adding to the wind chill effect.

Forecast for Tuesday 15 Feb 2022

Weather: Cloudy with a band of rain will spreading east during the early hours which will fall as sleet on the summits. The rain will clear quite quickly in the morning with brisk, cold northwesterly winds afterwards, gales at higher levels, this will drive a few wintry showers through the area later on Tuesday, falling as snow above 600m. Further rain will spread north later in the evening.

Maximum wind: Southwesterly 25mph gusts 40-45mph, turning westerly later 20 mph with gusts 30mph.

Chance of cloud-free hill tops above 700m: 40% associated with rain and sleet moving east in the morning, improving to 70% in the afternoon as most tops seeing some clearance but cloud lowering in any wintry showers.

Low cloud and visibility: Scattered or broken cloud above 500m in the morning as rain and sleet moves east, visibility in the rain will be moderate for a time but improving quite readily by mid morning and cloud bases lifting. Some patches or scattered cloud will form around tops in any wintry afternoon showers and visibility may turn quite poor for a time as the shower passes. Visibility will turn poor in the evening as cloud and rain spreads north again.

Temperature: **Valleys:** Plus 5 or 6 Celsius.
At 700m: Minus 1 Celsius rising to plus 2 Celsius later.
Freezing level: 6-800m rising above the summits later.
